

How to reactivate sync:

First go to the computer that does the sync process.

Open family directory and go to the Diocese menu item. Then click on “Synchronize Data to Diocese”

The following screen should come up:

This screen should then come up. Click on “No”

On the bottom of the screen in the system tray should then be this icon.

If you see this icon then it means that you are syncing with Pastoral Center.

Note: The person running sync needs to be a power user or administrator on the local pc.
